PRIYANSHI RANA

Full-Stack Developer (MERN & Python/FastAPI)

Dehradun, Uttarakhand | 8126348821 | priyanshirana24@navgurukul.org

GitHub: github.com/priyanshirana-00 | **LinkedIn:** linkedin.com/in/priyanshirana00 | **Portfolio:** portfoilo00.netlify.app

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building MERN stack applications and Python (FastAPI) backends. Developed RESTful APIs, integrated React.js frontends with backend services, and built AI-integrated applications using the Google Gemini API. Completed a frontend development internship and independently built and deployed end-to-end projects on Vercel and Render.

TECHNICAL SKILLS

Languages: JavaScript (ES6), Python, HTML5, CSS3

Frontend: React.js, Responsive Web Design

Backend: Node.js, Express.js, FastAPI, REST API Development, User Authentication

Database: MongoDB

AI & API Integration: Google Gemini API, Gemini TTS, Web Speech API, Third-Party API Integration

Tools: Git, GitHub, Postman, Thunder Client, VS Code

Deployment: Vercel, Render, Netlify

INTERNSHIP EXPERIENCE

Frontend Developer Intern — MISO-Creations | *3 Months* View Certificate

- Developed responsive, reusable UI components using HTML, CSS, JavaScript, and React.js, improving usability across devices.
- Integrated frontend features with REST APIs, improving cross-browser responsiveness and user experience.
- Collaborated with the development team using Git and GitHub for version control and peer code reviews.

PROJECTS

AI Buddy — AI-Powered Speech-to-Speech Chatbot Live Demo (Frontend)

React.js, Python, FastAPI, Google Gemini API, Gemini TTS, Web Speech API, Base64 Audio Encoding

- Built a voice-based AI assistant that lets users speak to the application and hear a spoken AI response, using React.js on the frontend and a Python FastAPI backend.
- Implemented speech-to-text in the browser with the Web Speech API and sent the recognized text to the FastAPI backend over REST.
- Integrated the Google Gemini API to generate AI responses and Gemini TTS to convert them into speech.
- Encoded the generated audio in Base64 on the backend, then decoded and played it on the frontend, completing the speech-to-text → AI → text-to-speech pipeline.

Eventify — Event Management Platform Live Demo

React.js, Node.js, Express.js, MongoDB, REST APIs

- Independently developed a full-stack event management application, covering frontend, backend, and database design.
- Designed and built 10+ RESTful API endpoints with Express.js and MongoDB, with user authentication and full CRUD for events and users.
- Built the React.js frontend and integrated it with the backend APIs for dynamic data handling.

AI Chatbot — Third-Party AI API Integration Live Demo

JavaScript, Third-Party API Integration

- Built a chatbot application that integrates a third-party AI API to generate automated responses to user messages.
- Designed a clean, responsive chat interface for smooth interaction on mobile and desktop.

EDUCATION

Bachelor of Computer Applications (BCA) — Eternal University *2024 – 2027*

GPA: 8.66 | Relevant Coursework: Web Development, Python for AI/ML

CERTIFICATIONS

- Version Control — Coursera Verify Certificate
  Learned core version control concepts: repositories, commits, branching, merging and resolving conflicts with Git.
- Introduction to Git and GitHub — Coursera Verify Certificate
  Learned the Git and GitHub workflow: cloning, pushing, pull requests, forks and collaborating on shared repositories.
